Arkadiy Shtykov

AI Voice Creator · Audio Engineer · Multilingual Voice Model Specialist
hello@arcadias.pro · [Telegram - https://t.me/+CFtIUFqL8gwwY2Zi] · Arcadias.pro

Professional Summary

Top-performing AI Voice Creator and Audio Engineer focused on premium voice model development, multilingual voice workflows, and production-ready audio delivery for modern dubbing, branded content, and digital media. Strong commercial performance on ElevenLabs with a portfolio of professional voice models used across multiple languages and content categories.

Specialized in building clean, stable, and commercially usable voice outputs through a workflow that combines voice model selection, script adaptation, multilingual generation, quality control, and studio-grade audio cleanup. Experienced in creating premium voice assets for trailers, explainers, short-form content, narration, educational media, and brand communication.

Known for combining technical precision with aesthetic judgment: not only generating audio that sounds impressive in demos, but delivering voices that feel consistent, controlled, and usable in real production environments.

Core Strengths

- AI voice creation and voice model optimization
- Multilingual voice generation workflows
- Shared voice model strategy and positioning
- Audio restoration, cleanup, and polish
- Dubbing-ready delivery and voice QC
- Script adaptation for natural TTS performance
- Voice selection by content type and tone
- Premium showreel creation for voice models
- ElevenLabs workflow knowledge
- Brand-oriented audio presentation

Selected Highlights

- Built and positioned a portfolio of professional shared voice models for multilingual commercial use
- Developed model-specific content strategies for premium brand voice, narration, entertainment, conversational hosting, and educational delivery
- Produced multilingual voice samples and video voiceovers designed for platform demos, recruiter review, and commercial evaluation
- Structured voice workflows for consistent generation across multiple languages while preserving tone, rhythm, and usability
- Combined voice generation with studio-grade cleanup and presentation to create premium-ready assets for AI dubbing and media pipelines

Professional Experience

Independent AI Voice Creator & Audio Engineer

2019 – Present

- Created and managed a portfolio of premium AI voice models for multilingual content generation and commercial testing
- Produced voice samples and voiceover sets across multiple languages for different model identities and use cases
- Designed voice positioning for flagship, narration, entertainment, conversational, and educational models
- Prepared scripts optimized for natural generation, consistent pacing, and multilingual comparison
- Built premium showreels and presentation assets for recruiters, studios, and platform-based evaluation
- Applied audio cleanup, loudness balancing, and delivery optimization for polished final outputs
- Worked with platform-native workflows inside ElevenLabs, including model discovery, sample generation, and usage recommendations
